Springer. Hardcover. Book Condition: New. Hardcover. 264 pages. Dimensions: 9.2in. x 6.1in. x 0.8in. Approach your problem from the right end It isnt that they cant see the solution. and begin with the answers. It is that they cant see the problem. Then one day, perhaps you will find the final question. G. K. Chesterton. The Scandal of Father Brown The point of a Pin. The Hermit Clad in Crane Feathers in R. van Guliks The Chinese Maze Murders. Growing specialization and diversification have brought a host of mono- graphs and textbooks on increasingly specialized topics. However, the tree of knowledge of mathematics and related fields does not grow only by putting forth new branches. It also happens, quite often in fact, that branches which were thought to be completely disparate are suddenly seen to be related. Further, the kind and level of sophistication of mathematics applied in various sciences has changed drastically in recent years: measure theory is used (non-trivially) in regional and theoretical economics; algebraic geometry interacts with physics; the Minkowsky lemma, coding theory and the structure of water meet one another in packing and covering theory; quantum fields, crystal defects and mathematical programming profit from homotopy theory; Lie algebras are relevant to filtering; and prediction and electrical engineering can use Stein spaces. And in addition to this there are such new emerging subdisciplines as experimental mathematical, CFD, completely integrable systems, chaos, synergetics and large-scale order , which are almost impossible to fit into the existing classification schemes. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Hardcover.
