Brand New Book ***** Print on Demand *****.Excerpt from Barker on Heating: The Theory and Practice of Heating and Ventilation The object of the present work is to place English speaking readers a detailed explanation of the application of scientific principles to the chief problems with which the Heating Engineer has to deal, and further, to indicate the limits within which these principles are applicable in practice. Its aim is not to describe practical details of construction nor of the mechanical work involved in the erection of an apparatus. These in the opinion of the Author, can only be learnt properly by handling the things themselves. Considerable experience of this, as well as of several other important branches of engineering, has convinced the Author that apparent discrepancies between theory and practice are here both more important and more difficult fully to account for than is the case in most other branches. A full comprehension of the limitations within which theory is applicable is therefore almost as necessary to a thorough understanding of the subject as knowledge of the principles themselves. There is a marked...
