The remaining cases on the right wall and all of those on the left show the geographical distribution of the bird fauna of the world The specimens are grouped according to their great faunal regions, the South American Temperate, American Tropical, North American Temperate, Arctic Eurasian, Indo-Malay, African and Australian realms. These cases in connection with the accompanying maps give opportunity for a comparative study of the birds of the different parts of the world. In each region, as in the Synoptic Collection, the birds are arranged in their natural groups to the best of our present knowledge. Down the middle of the hall near the entrance are several cases containing birds which have become extinct or nearly so. The Extinct Birds x., . T T, Labrador Duck, once a common visitor to our Long Island shores, became extinct for no...
