Date :2010-01. Chicken industry is China's livestock industry's leading industries. Since 1985, China's egg production than the United States, the total output has ranked first in the world. In 2008, the national production of 2045 million tons of eggs. In 1978, the national per capita share of eggs was 2.4 kg in 2008 is 20 kg, 8.3 times in 1978. With the rapid development of poultry industry and the management of laying hens feeding the deepening of China's chicken has been present from quantity to quality-oriented changes in the market and consumers are more concerned about quality, safe, secure and pollution-free egg. Free-range hens before the beginning of intensive cage layer of the original production, but with today's backyard hens in the traditional sense of the earth (wood) not identical to chicken farming. Now free-range hens from the ecological sustainable development of agriculture, livestock integration, recycling of agricultural, ecological farming and animal welfare point of view, based on ecology, ecological economics, the traditional farming methods and modern science and technology of organic combined; according to woodland, orchards, pastures, cotton, Grassy slopes, river banks, beaches and other features can make full use of grazing land and space resources, stocking and homes to support the implementation of layer combination mode of production, to produce pollution-free food or even green eggs and chicken, organic food. More Contents: Preface First, China's egg industry Second, the existing business model layer industry, problems and prospects three or four pollution-free egg production, pollution-free certification and management of five eggs, free-range hens production of six, pollution-free free-range egg production issues and trends Chapter...
